

NO MORE TRASH SORTING!

Athens has implemented programs to help the City of Pasadena achieve the waste reduction mandates set by California's tough waste management law, AB939.

The **GOOD NEWS** is that this new program will **SAVE YOU TIME and EFFORT!** You **no longer need to sort out your Recyclables** from the rest of your waste stream. Your entire waste stream is transported to the Athens Material Recovery Facility where your recyclable materials are retrieved from the trash and diverted away from local landfills, as it is in South Pasadena, Temple City, San Gabriel, Azusa, Glendora, West Covina, Monterey Park, Montebello, Monrovia, South El Monte, and many other neighboring cities.

This program is the **simplest and least costly method** available today:

- You will not need any additional containers
- You will not need to sort any materials
- Please refer to the storyboard below for a more detailed explanation of the program.

NOTE: If you have a large quantity of recyclable material(s), and are willing to sort the material(s), we could possibly pay you for the current market value!

Call us for a FREE WASTE STREAM ANALYSIS!

Trash collected is dumped onto the Tipping floor and moved with heavy

equipment onto the Walking Floors toward the processing equipment

where employees and machines will sort out the recyclables.

Once sorted, recyclable materials are moved via conveyor

to the massive baler, where they are prepared

for shipment to foreign and domestic markets.
